PROFESSIONAL SUMMARY

Backend-focused Fullstack Developer specialized in ASP.NET Core and Angular. Expert in building scalable architectures, SQL Server optimization, and AI-driven system enhancements.

EXPERIENCE

Advanced Graph-Based Problem Resolution System

Designed and implemented a comprehensive dialectic problem-resolution system utilizing graph data structures. Built a custom window-based GUI in Angular 18+ and a high-performance .NET 8 backend for complex graph analysis and persistence.

Technologies: *Angular 18+, RxJS, Signals, SCSS, .NET 8, ASP.NET Core, EF Core, SQL Server, Docker, Graph Analysis*

AI-Powered Suggestion Engine (RAG)

Developed a microservices-based platform for intelligent chat suggestions using Retrieval-Augmented Generation. Integrated Google Gemini 2.0 for semantic embeddings and interaction success evaluation, with a PostgreSQL/pgvector storage layer.

Technologies: *Python, FastAPI, Google Gemini 2.0, PostgreSQL, pgvector, .NET 9, ASP.NET Core, Angular 19+, Docker*

Professional Arboriculture Services Platform

Developed a high-performance, SEO-optimized static site for a specialized tree service. Implemented localized SEO strategies, JSON-LD structured data, and modern UI components with GSAP animations for optimal user engagement and local search ranking.

Technologies: *Astro, Tailwind CSS v4, GSAP, TypeScript, Responsive Design, Local SEO*

SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, Angular
- Backend: C#, ASP.NET Core, SQL/SQL Server, EF Core (Entity Framework Core)
- Tools & DevOps: Git/GitHub, Docker, GCP, Dependency Management (e.g. Grafana K6)

EDUCATION

- University of Buenos Aires - B.S. in Data Science (Math & CS), 2025 - 2032
- IBM - AI Fundamentals Certification, 2026
- Fray Luis Beltran Secondary School, 2017 - 2024

LANGUAGES

- English: Advanced (Spoken & Written)
- Spanish: Native
